SUSPENSION AND STOP WORK ORDER

On June 10, 2005, you were issued a right-of-way grant for the Green Peak Quarry near Rosebud, Box Elder County, Utah. The right-of-way grant was conditioned by your approved mine plan entitled "I&P Investments Mine Plan of Operations, Green Peak Quarry, Box Elder County, Utah" dated April 2005.

In the mine plan and the right-of-way grant you are required to reclaim an existing mill site located on the county maintained road in the NE1/4 of Section 23, T. 10 N., R. 16 W., SLM. The right-of-way for the mill site expired on December 31, 2007 and the reclamation was to be completed prior to that time. We sent a letter to your address of record reminding you of this requirement in September 2007 which was returned unclaimed. On January 11, we received a faxed copy of a letter explaining that you intend to complete reclamation in 2008. Since no reclamation work has yet taken place, this letter will serve as a notice that your right-of-way grant, serial number UTU-80785, for this mine is not in compliance with its terms and conditions.

As a consequence of your non-compliance, you are hereby given a **suspension and stop work order** preventing any further operations on this right-of-way until the Bureau of Land Management (BLM) authorized officer grants a temporary right-of-way for the mill site to extend the time to complete the required reclamation. Please complete the attached right-of-way application form SF-299 and return it to our office within 30 days of the receipt of this notice in order to request a temporary authorization for the mill site. This application for a temporary authorization will require the payment of processing fees.

Failure to respond within the required timeframe or refusal to complete the reclamation will result in a termination of the right-of-way grant and the use of your financial guarantee funds to complete the work.

If you have any questions, please contact Mike Nelson of my staff at (801) 977-4355.
